

Supporting housing supply in NSW

Delivering our water future

Sydney Water is delivering a transformative investment in our city to ensure our water, wastewater and stormwater systems meet the needs of our customers now and in the future.

Our infrastructure delivery is timed to support the NSW Government's growth ambitions and is aligned with housing supply policy. New infrastructure, amplifications and upgrades will ensure the resilience and reliability of our water supply for generations to come.

The expansive program of work is being delivered across Greater Sydney, including the Blue Mountains and the Illawarra. A significant number of projects are currently in planning, while many are in delivery or have been completed.

Explore the [Major Projects Pipeline](#).

Sydney Water's Infrastructure Investment Program is aligned with the NSW Government's housing supply policy and vision for our water future through the Greater Sydney Water Strategy.

The plan is adaptive and follows an integrated water management approach to ensure the resilience of our water supply as our city grows, affordable bills for our customers, and protection of our natural environment.

Sydney Water's infrastructure delivery is timed to align with government priorities including the Transport Oriented Development (TOD) program:

- All TOD sites can be serviced within the accord period with no to minimal investment
- A further 15 sites could be included in Tier 2 with no to minimal investment, and
- Some TODs could accommodate higher forecasts with no to minimal investment.

Sydney Water is also delivering infrastructure to support current developments and forecast growth areas across Greater Sydney, particularly Western Sydney.

Benefits for our customers and communities

Able to service most TOD sites with no to minimal investment to keep bills affordable

Reliable water and wastewater services for new Transport Oriented Development precincts

Investment

No to minimal investment
